WORK EXPERIENCE

Geocaching HQ

Mar. 2022 – Present

Senior Systems Administrator

Seattle, WA

- Apply project management skills to design, lead, and coordinate on IT's largest and most complex projects.
- Team Lead of hardware deployments at our datacenter. Designated team member to build and provision server hardware and carry out the deployments and bring the servers into our production environment.
- Automate tasks using scripting languages and config management. I use languages and tools such as DSC, PowerShell, BASH, and Salt.
- Responsible for vSphere ESXi infrastructure. Led the multi-year project that tripled the size of our virtual environment while upgrading from 5.5 to 7.0.
 - Main contact on 2 recent projects that replaced our outdated shared storage P2000 and Ultrastor with 2 TrueNAS M50HA's and also replaced our shared HP modular 10G switch with 2 100G Mellanox Switches. I was able to do it entirely with high availability and 0 customer downtime.

Geocaching HQ

Dec. 2019 – Mar. 2022

Systems Administrator

Seattle, WA

- Configuration and deployment of common linux web and application servers (RabbitMQ, WordPress, Nginx, Node.js, Strapi, etc.) using configuration management systems.
- Configure, deploy, administer, and maintain Windows and Linux web/application servers, network and storage devices, databases, monitoring systems, backup systems, VMware environment, etc.
- Operating systems support. Provide assistance with Windows, Linux, and Mac environments across HQ.

Geocaching HQ

Oct. 2017 – Dec. 2019

Junior Systems Administrator

Seattle, WA

- Provide support for hardware, phone systems, local area networks, file shares and permissions, support tracking/ticketing systems, VPN client applications, mail systems, backup systems, and antivirus systems.
- Maintain our multi-forest Windows environment by using tools such as Active Directory, Group Policy, and user rights assignment, and other Windows management tools.

HDR, Inc.

Dec. 2016 – Oct. 2017

IT Analyst

Bellevue, WA

- Managed Active Directory, automating software deployment through Batch, VBS, and PowerShell, and to find and create automated solutions to common issues and requests submitted by users through SCCM.

Bellevue College

Jun. 2013 – Dec. 2016

Network Technician; Deployment Technician; Helpdesk Agent

Bellevue, WA

- Worked multiple roles throughout Bellevue College learning all about infrastructure and IT common problems.

EDUCATION

Bellevue College

September 2013 - June 2017

Bellevue, WA

- Took IT classes focused on best practices, CCNA, CCNP, and CCNAS while working FT at the school.
